

BaZi for Daily Living

Course Introduction:

The purpose of learning BaZi is to know your own destiny, when you should be aggressive, and when you should be patient.

To achieve this goal, you must first know how to read your BaZi, know what periods of fortune you are working on. When your luck is good, you should work harder. When your luck is bad, you should be careful. If you win more and lose less, you will definitely win and the ultimate winner.

There are only 20 lessons in this course. The first eight lessons teach basic concepts, the next six lessons teach how to manage your destiny, and the last six lessons teach you how to control your destiny.

The basic concept is the most important part of learning BaZi. When students know how to read BaZi, they need to learn how to control good luck and manage bad luck. Start with managing bad luck, you learn to avoid accidents, wrong decisions, financial losses, conflicts with bosses, and destruction of stable life. Then you learn to control good luck, grasp opportunities such as wisdom, wealth, promotion, great help, and self-prosperity.

The feature of this course is life-oriented. After completing the course, students can apply the theories and operations they have learned to calculate the destiny for themselves, or their family and friends, and verify the power and efficacy of the BaZi.
